

# A. The everlasting lightbulb never made it into production

## Automec's everlasting Brake and Clutch Fluid is available now

AUTOMEK BRAKE FLUID IS THE MOST ADVANCED BRAKE AND CLUTCH FLUID YOU CAN BUY

Because Automec's Silicone Brake Fluid repels moisture, unlike standard polyglycol brake fluid, it never needs changing. Rust and corrosion are inhibited because moisture is kept out of the system, and the high boiling point of 260°C (500°F) is maintained throughout the life of the product, ensuring consistent, long-term, safe performance.

#### Automec Silicone Brake Fluid:

- Lasts a lifetime*
- Will not catch fire*
- Guarantees consistent performance*
- Will not damage vehicle paintwork*

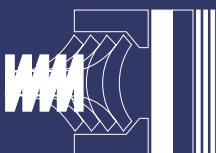

#### Normal polyglycol brake fluid:

- Needs changing regularly*
- Is highly combustible*
- Can give inconsistent performance*
- Can damage vehicle paintwork*

Automec's DOT5 Silicone Brake Fluid conforms to the highest acknowledged standards, the US Department of Transportation (DOT)5 standard as well as the Federal Motor Vehicle Safety Standard (FMVSS)116 and US Military Standard MIL B46176 and has been standard issue in US Military vehicles for over 15 years.

So maybe it's time that you put Automec Silicone Brake Fluid in your braking system.  
*It will save you money, and it could save your life.*
